## Pricing caveats - 2017

---

---

### Pricing Caveats

1. Our submission is subject to agreement by both parties of the terms and conditions of service and is based on a 1 year service agreement.
  2. All rates quoted are exclusive of VAT.
  3. The service charges detailed within the pricing mechanism are fixed for a period of 12 months from the commencement of the contract.
  4. Should the Freight Transport Association Bulk Diesel (Net Derv) index move greater than 15%, up or down, from its position on April 2015, then transport charges may be altered, up or down, at any time to reflect the change in fuel cost. For the avoidance of doubt, fuel will be deemed to constitute 20% of transport charges.
  5. Our rates for recycling are based on our material spec which is included within our submission along with no contamination of the material and are subject to final acceptance at the Material Recovery Facility.
  6. The proposal takes into account all prevailing UK legislation affecting the contract services. Unforeseeable and future changes in law, resulting in cost implications which deviate either above or below the financial projections, will be treated as contract variations and adjusted accordingly through the prices submitted
  7. Any damaged caused to containers other than fair wear and tear will result in a charge for repair/replacement
  8. The prices supplied within the pricing schedule are submitted based an assumed weight, of that stated within the tender document. Should the actual containers weights exceed the assumed weight, then Veolia reserve the right to review its pricing for the specific customer. This will only be after the first month service to the individual client.
